

Keg Commander

ABE
EQUIPMENT

Dirty kegs? Clean them with the Keg Commander Keg Washer by ABE Equipment. This dual-head system cleans and purges up to 34 kegs per hour and is compatible with most standard couplings (A, S, D & U). The independently adjustable cleaning heads allow you to clean different sized kegs simultaneously. The process can be controlled with the HMI touchscreen interface, increasing or decreasing the length of each of the 21 steps in the cleaning cycle. This durable machine is constructed of 304 stainless steel, including the piping, and has two separate heated liquid holding tanks to ensure a thorough reserve for the entire cleaning process.

When the mission calls for speed and spotless results, the fully automated dual-head Keg Commander Keg Washer is built for the task.

Easy and Efficient

- Once started, the system can be left unattended until cycle is complete
- Low liquid sensors in each tank protect heaters and pumps
- Keg holders are independently adjustable to clean different sizes simultaneously
- 21-step cleaning process with adjustable step timing
- Independent temperature controls for each solution tank
- No manual keg coupling

6-inch Color Touchscreen

Dual Head Keg Washer

- Stainless steel construction including piping
- Compatible with standard couplings (A, S, D, and U)
- Designed and assembled in the USA
