

SmartShot Labeler

ABE
EQUIPMENT

The SmartShot15 Labeling System is designed to label & date code craft beverages in bottles or cans at a rate of up to 15 round containers per minute. The simplistic design of the SmartShot15 Labeling System enables quick fixes and easy adjustments. Given the durability and solid structure of the design, the SmartShot15 Labeling System provides an affordable and reliable option for the small to medium-sized operator.

To initiate the system, an operator places your craft beverage into the horizontal fixture, and depresses a foot switch to begin the label application process. Once the foot switch is depressed, the package begins to rotate, labeling and coding with precision. It really is that simple! As governing bodies continue to legislate new product coding and tracking requirements, it becomes your responsibility to stay ahead of the curve; the SmartShot15 Labeling System is your solution.

Convenient Design

- Complete label application and date coding capabilities in one
- Easy-view operator controls
- SD card slot for future firmware and font upgrades
- The most compact size in the industry
- Designed to print date / batch code on label prior to label application

Premium Features

- Complete with customer assembled, Military Grade 8625, Type 2, Anodized Aluminum frame
- Built-in photo sensor and auxiliary port for optional external photo sensor
- Anti-shock mounting for printer protection
