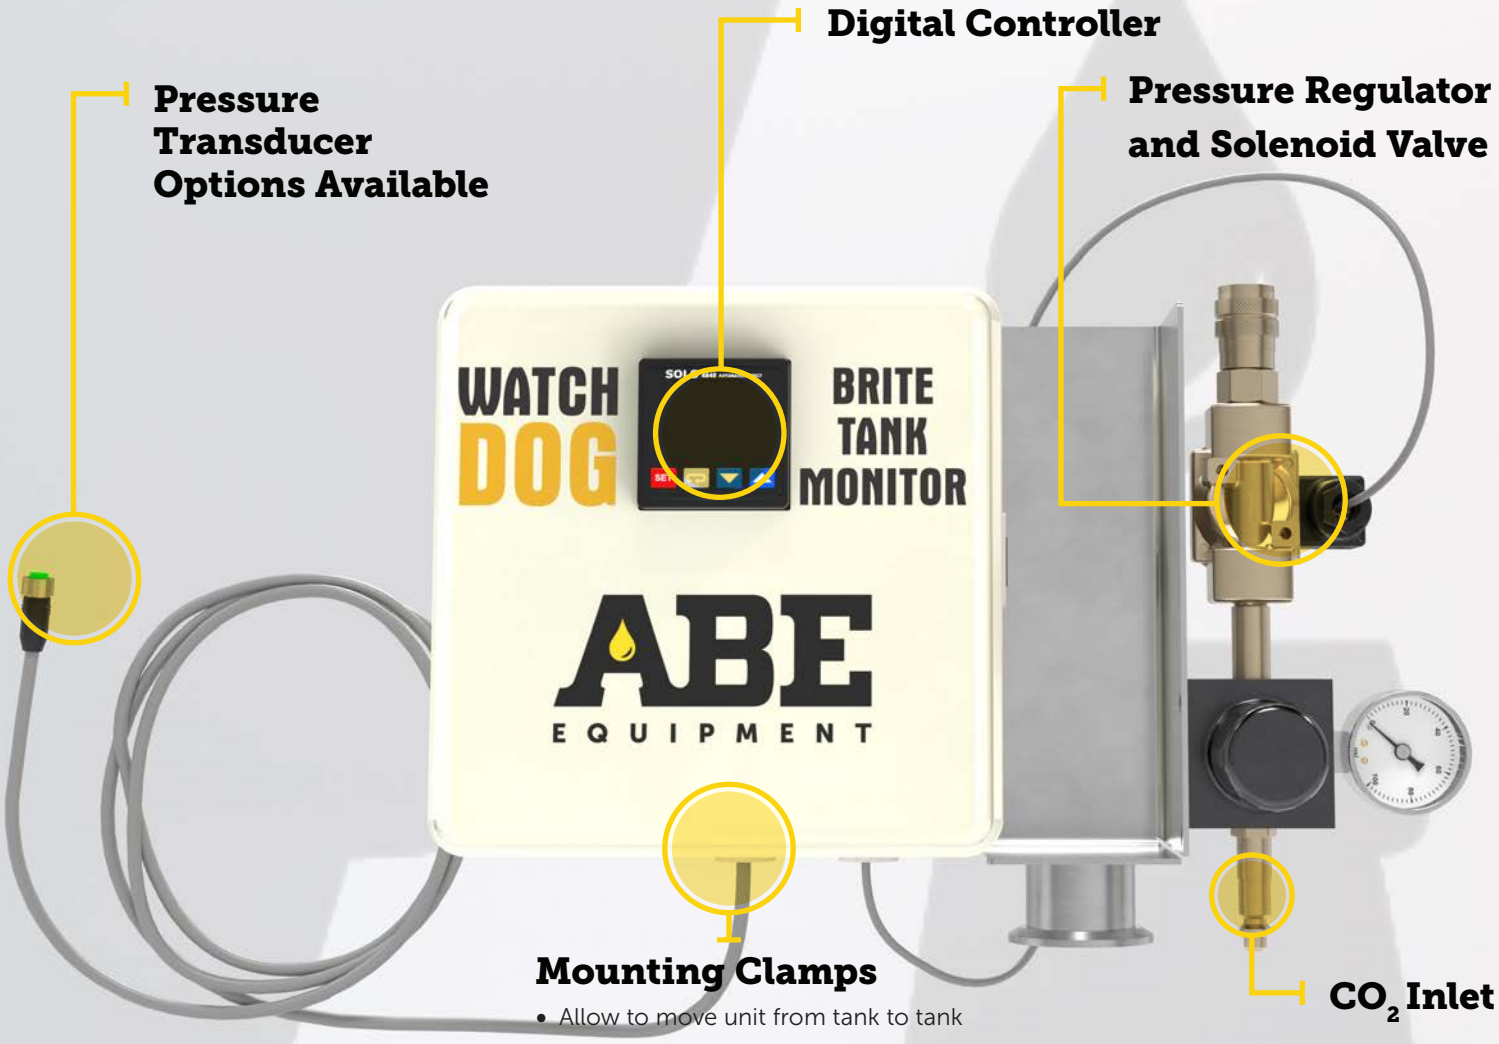
WatchDog

The WatchDog Brite Tank Monitor is designed to monitor and control the CO2 pressure in the Brite Tank via a pressure sensor and regulator. The operator sets the controller to the desired tank pressure and it will automatically adjust the input to maintain the proper CO2 levels. ABE recommends a WatchDog with each packaging line to achieve consistent carbonation and pressure whether your tank is full or nearly empty. Your packaging line will run consistently through the entire shift by maintaining a consistent output pressure, ensuring accurate filling on your packaging line.



Your Complete Package

Each WatchDog that leaves our facility carries UL certification and an industry-leading five year limited warranty on the metal and welds. In addition to a comprehensive spare parts inventory, you'll receive superior customer support from our team in Lincoln, Nebraska with any ABE purchase.
