Freedom100 Blow Molder

The Freedom100 Blow Molder heats and blow-molds preforms into large-format bottle sizes. The Freedom Series PET Blow Molders save you money by bringing the manufacture of your bottles in-house instead of shouldering the costs of vendors' pre-made bottles. Free up valuable inventory space by making bottles when you need them. The streamlined design of the Freedom100 makes it easily operated by one user. Delivered as a complete set, the heat tunnel, internal heating rod, and blow molder unit are all standard with each Freedom100 Blow Molder. The system can be purchased as a stand alone solution or as complete solution with compressors, chillers, drier and air filtration package, or as part of a complete water plant.

Take control of your supply chain with the Freedom100 Blow Molder!
